FEATURED PROJECTS

SIGEVU — Integrated Housing Management System

CORPOLARA | Professional Internship Project

Developed a web platform for managing beneficiaries, housing units, and residential projects, centralizing information and optimizing administrative processes. Implemented MVC architecture, relational database design, user authentication, report generation, and bulk data import.

Technologies: *PHP, MySQL, JavaScript, Bootstrap, HTML5, CSS3.*

ARM Gym

Administrative Management System for Gyms

Developed a full stack web application for managing clients, monthly memberships, payments, and gym revenue. Implemented role-based access control, financial dashboard with interactive charts, REST API, audit log, and security measures against SQL Injection and CSRF.

Technologies: *PHP 8, MySQL, TailwindCSS, JavaScript, Chart.js, MVC.*

Kg Tires

Specialized Tire E-commerce

Designed and implemented an online store targeting the U.S. market for the sale of industrial and specialized tires. Configured WooCommerce, product categories, variants, Klarna financing, and SEO optimization to improve the shopping experience and conversion rates.

Technologies: *WordPress, WooCommerce, Elementor Pro, PHP, JavaScript.*

My Speedy Printing

Corporate Website

Developed a corporate website for a commercial printing company in Houston, Texas. Implemented a responsive landing page aimed at client acquisition, quote forms, and later migrated the project to a custom WordPress template to facilitate content management.

Technologies: *HTML5, CSS3, JavaScript, PHP, WordPress.*
